

Add Value and Maintain Accuracy

Regular calibration helps to ensure that your screening equipment continues to provide accurate readings. Though School Nurse Supply offers high quality, high precision products, routine maintenance and periodic calibration may be required to keep your instruments operating at a high level. Calibration confirms consistent quality of results, maintaining the reliability of your equipment, and the quality of care for your patients.

School Nurse Supply offers calibration and repair of most screening and diagnostic equipment. Audiometers, Tympanometers, Vision Screeners, Thermometers, Otopscopes, Ophthalmoscopes and devices can all be sent in for service. **FREE ESTIMATES** will be given on all repairs, while standard calibrations start at \$79.00 each – this includes the cost of shipping your equipment back to you.

Ship your equipment to:

**School Nurse Supply
ATTN Calibration & Repair Dept
1690 Wright Blvd
Schaumburg, IL 60193**

Please include the completed Calibration & Repair Form found below. Turnaround of most calibration and repairs are estimated at 2 to 3 weeks. We strive to keep service time at a minimum, so that you can get back to screening as quickly as possible.
